

Instructions for motorised roller bar system

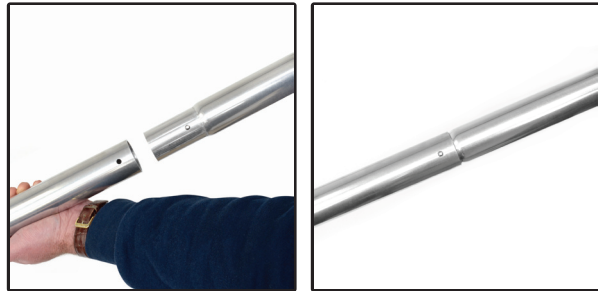

Key:

a = 1m bars

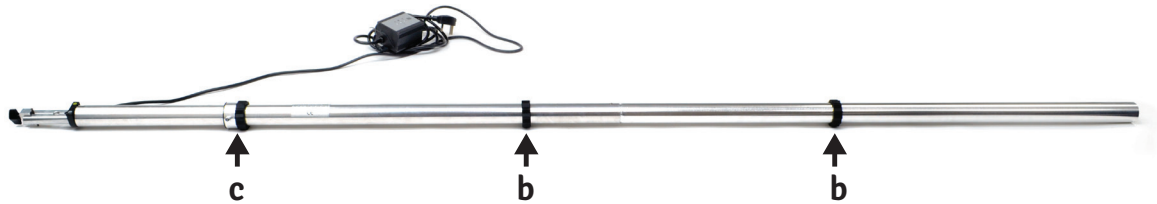

b = plain black O ring

c = silver & black O ring with locking pin

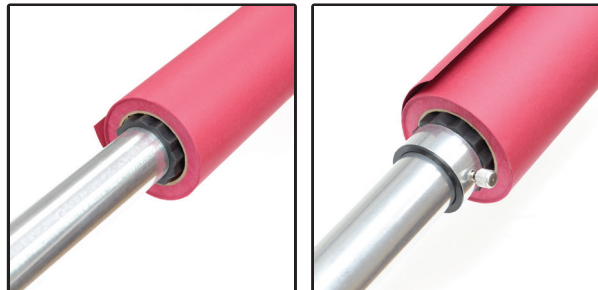

1. Simply push the three 1m bars together and locate using the locking pin and hole.

2. Push onto the bar the first silver and black O ring with the locking pin, then the first plain black O ring then the second plain black O ring, space them evenly apart.

3. Now you are ready to mount the paper roll, guide the end of the motorised roller bar into the core of the paper and push the roll onto and over the plain black O rings, the core is just big enough to slide over the plain black O rings but must sit against the the furthest silver and black O ring. Now put the second silver and black O ring onto the bar and locate it into the core end of the backdrop.

4. Now, simply lift the whole assembly and locate both ends of the motorised bar onto the wall mounted brackets or G clamps, whichever you are using. Now you're ready to go!
